Structure/rules of energy markets; land use; energy/fiscal policy.

Biography

Michal C. Moore is the former chief economist at the U.S. National Renewable Laboratory in Golden Colorado, where he led a research team engaged in examining over-the-horizon issues for the U.S. Department of Energy and developing new methods for cross-cutting analysis. He is an economist and a former commissioner with the California Energy Commission, where he held the designated economist position.

Research Interests

Dr. Moore is an active researcher in the areas of urban open space and agricultural land conversion, local government fiscal impacts and the structure and rules of energy markets. He is an accomplished public speaker and participates in a wide variety of public forums ranging from energy and fiscal policy to land use.
