Biography

Mr. Terry G. Tyler is the Chief Technology Officer and Chief Information officer for ENMAX and responsible for the company's long-range vision for the industry including screening and evaluating technologies for their potential applicability as well as strategic process transformation and the efficient and effective use of information. Mr. Tyler also oversees the regulated and retail billing and customer care functions for ENMAX. Prior to joining ENMAX in July 2008, Mr. Tyler held executive roles at Tennessee Valley Authority, IBM Business Consulting Services, Florida Power Corporation, Comanche Peak Nuclear Plant. Mr. Tyler also formed and co-owned a successful consulting company, Energex, which was the Program Manager for the post Three Mile Island Industry Degraded Core Rulemaking (IDCOR) program for Department of Energy (DOE) and Nuclear Regulatory Commission (NRC).
